## Tech Stack:

- |              |         |                |           |                |
|--------------|---------|----------------|-----------|----------------|
| • TypeScript | • SQL   | • Azure DevOps | • React   | • Tailwind CSS |
| • JavaScript | • HTML5 | • AWS          | • Next.js | • Deepseek R1  |
| • C#         | • Azure | • Angular      | • .NET    | • Restful APIs |

## Projects

### ShearGenius - Team Lead/Back-End Dev

User-curated haircut gallery, scheduling app and hair information directory.

- Leading a small team in fullstack development, wrapping development time 1 1/2 weeks early
- SQL database for login, account information, schedule management, and multimedia posts with Restful API, hosted on Azure

### California Career Center – Fullstack Developer

Career Opportunity Web Application

- Spearheaded the development of a scalable fullstack solution using Angular, RESTful APIs, and C# to streamline job acquisition and career prospects for graduates and educators.
- Collaborated cross-functionally to integrate Azure DevOps CI/CD pipelines and optimize codebase performance 2 weeks ahead of schedule.

## Experience

### Codestack – San Joaquin County Office of Education

Junior Web Developer (November 2025 – Present)

- Engineered and maintained responsive web applications for a diverse portfolio of clients nationwide using a modern full-stack transition.
- Improved site performance and SEO by optimizing front-end components and streamlining back-end database queries.

### Codestack

Academy Graduate, Web Development Intern (September 2024 – August 2025)

- Navigated and contributed to complex codebases, ensuring efficient collaboration and seamless integration of new features.
- Completed development tickets promptly, delivering high-quality solutions while adhering to best practices in debugging, optimization, and maintainability.

### Tom's Watch Bar

Server Lead (September 2023 - March 2025)

- Trained new hires on corporate-standard practices and duties
  - Fulfilled customer needs and adhered to time quotas
-
